## Project 2A Notes

- Concept 1: Artist Name Guesser
  - Most musical artists we know and love do not use their real names for their work. Whether the name is wild and outlandish or sounds like it could be legit, the odds are your favorite musician is using a stage name. For this concept, it would be a guessing game. Each screen will display images 2 musical artists along with a legal government name. The user will have to click the name of one of the artists whom they think matches the real name shown at the top of the screen. If the user is correct, they will be shown a positive message with a gif to match and will be able to click to the next question. If they are incorrect, they will be told to try again and have the ability to click back to the question, where they can put in the correct answer in order to move on.
- Concept 2: Face Drawing Tutorial
  - My backup concept is an interactive tutorial in which the user would be learning how to draw a face. Each step would give the user multiple options for what part of the face should be drawn next. If the user is right, they will be shown a “that’s correct” screen and have the ability to move on to the next step. If they are wrong, they will be shown a screen telling them it isn’t time for that step yet and to try again.
